PROJECTS

Google Meet Telegram Bot	(May 2021 - June 2021)
https://github.com/koteshrv/googlemeet-telegrambot	

It is a telegram bot that automates google meet using selenium. You can schedule all the meetings and it will join automatically in the cloud. It can send an alert when someone called, auto respond when alert triggers, joins and leaves the class according to the members count, reply, and many more.

Serve Bot	(December 2020 - April 2021)
https://github.com/koteshrv/Serve-bot	

This project was made for an old age home. It's a line follower used to serve the food and records the needs if required. It was built using an Arduino mega 2560, aPR33A3 voice playback module. It can detect obstacles, record, and play, charging auto cutoff. It requires 220V AC to charge.

Responsibilities: Lead my team under the guidance of our HOD sir.
